

May 13th, 2021

Bill McBride
Executive Director
National Governors Association
444 North Capitol St.
Suite 267
Washington, DC 20001

Dear Mr. McBride,

On behalf of 1,644 undersigned medical, mental, and behavioral health providers, we issue the following open letter to the National Governors Association in opposition to over 25 anti-trans bills that would ban medically necessary, life-saving, gender-affirming care for transgender youth medical bans that are being proposed in 13 states¹². This is irresponsible policymaking that directly harms trans youth and their families across this nation. In fact, according to the American Academy of Pediatrics, these anti-trans medical bills will not only negatively impact the health and well-being of trans youth but also allow government officials unwarranted interference in health care decisions that should be made with trans youth, their families, and their health care providers. In addition, the American Psychiatric Association, American Academy of Family Physicians, American Academy of Pediatrics, American College of Physicians, American College of Obstetrics & Gynecology, and the American Osteopathic Association published a joint statement opposing such bills that criminalize patient care³. Numerous health professional associations, including the American Medical Association, the Endocrine Society, the Pediatric Endocrine Society, and GLMA: Health Professionals Advancing LGBTQ Equality, have also adopted policy and/or made statements in strong opposition to these legislative efforts.⁴ We know that bills like these will negatively impact the

American Psychiatric Association. <https://www.psychiatry.org/newsroom/news-releases/frontline-physicians-oppose-legislation-that-interferes-in-or-criminalizes-patient-care>

⁴ Endocrine Society. (2020). Transgender Health: An Endocrine Society Position Statement. <https://www.endocrine.org/advocacy/position-statements/transgender-health>; Walch, A., Davidge-Pitts, C., Safer, J. D., Lopez, X., Tangpricha, V., Iwamoto, S. J. (2021). Proper Care of Transgender and

health care system's ability to provide high-quality care and will discourage talented health care providers from staying and providing health care within their states.

Such bills dictate and disrupt the confidential relationships we have with our patients and their family members, and deepen the mistrust the broader community has for health care in general. According to the US Trans Survey, 1 in 5 trans people refuses to seek health care services due to fear of being mistreated⁵. We also know that these bills have a negative impact on trans people, including trans youth especially as suicide rates continue to increase and trust in the medical system continues to decline. We know that gender-affirming care reduces the risk of suicide, especially for many trans children. In fact, one study from the journal "Pediatrics" found that the risk of suicide reduces by 70% for trans youth who receive gender-affirming therapies⁶. In addition, there is evidence that suggests anti-LGBT bills that disrupt services increase both skepticism for health care services and reluctance to seek care⁷. According to the Trevor Project, one in three trans and non-binary youth expressed not seeking mental health services due to fear of discrimination.⁸ To have legislators irresponsibly implement such bans will only exacerbate these numbers and impede us from doing what we are trained to do: ensuring that patients, especially the youth, lead healthier lives.

We believe that we have a duty to provide the best quality of care to the communities we work with--these bills will only impede on our duties. Anti-trans medical ban bills are unwarranted and will have a direct harmful impact on our communities, both patients and health care professionals. We, therefore, urge that governors do what's best for their constituents, oppose these bills so that health care providers can continue to provide medically necessary and evidence-based care that will save the lives of trans youth.

Gender Diverse Persons in the Setting of Proposed Discrimination: A Policy Perspective.
